

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Couplings Separated from 2 1/2" and 5" Snap-Tite Hose

July 2008 Tank Fire Setup Exercise

Highest Pressure on 2 1/2" Hoses was 210psi

Highest Pressure on 5" Supply Hose was 175psi

Service Testing

Failures a Combination of Coupling Slippage/Separation, & Hose Sweating/Leaking
Hoses Recoupled by Snap-Tite Authorized Representative
Testing Performed in Accordance With NFPA 1962 Chapter 7 Procedures
